HAS BEEN ACCEPTED FOR REGISTRY IN THE HERD BOOK, UNDER THE RULES OF THE ASSOCIATION, AND WILL BE NUMBERED AS ABOVE.

This certificate is issued in full reliance upon the truth of the statements contained in the application filed therefore, but in no event is it to be deemed a guarantee by the Association of the breeding of the animal and should said application be proved untrue, or should it be proved that said animal has no right to registration, this certificate and registry of the animal will be cancelled.

THE DEATH OF THIS ANIMAL SHOULD BE REPORTED TO THE SECRETARY
FOR CANCELLATION

Executive Secretary
Beloit, WI

RECORD OF TRANSFER

The owner of this animal has been duly transferred on the records of the Brown Swiss Cattle Breeders' Association as follows, but in no event is it deemed a guarantee of the legal or equitable ownership of the animal

STATEMENT ON GENETIC ABNORMALITIES

Animals which have parents or grandparents designated as carriers of a genetic abnormality are so noted with a line indicating such on the certificate itself.

The genetic abnormality is inherited as a simple recessive. Animals with a carrier parent have a 50% chance of being a carrier while animals with a carrier grandparent have a 25% chance of being a carrier.

Genetically abnormal animals are produced only when carriers are mated. Careful selection of mates for animals with carriers in their pedigree is needed to avoid producing affected progeny.

Any questions concerning genetic abnormalities may be obtained by contacting the National Brown Swiss Office.
